

WHAT TO DO IF ONE OF YOUR EMPLOYEES GETS STRANDED

EXTREME WEATHER IS THE NEW NORM

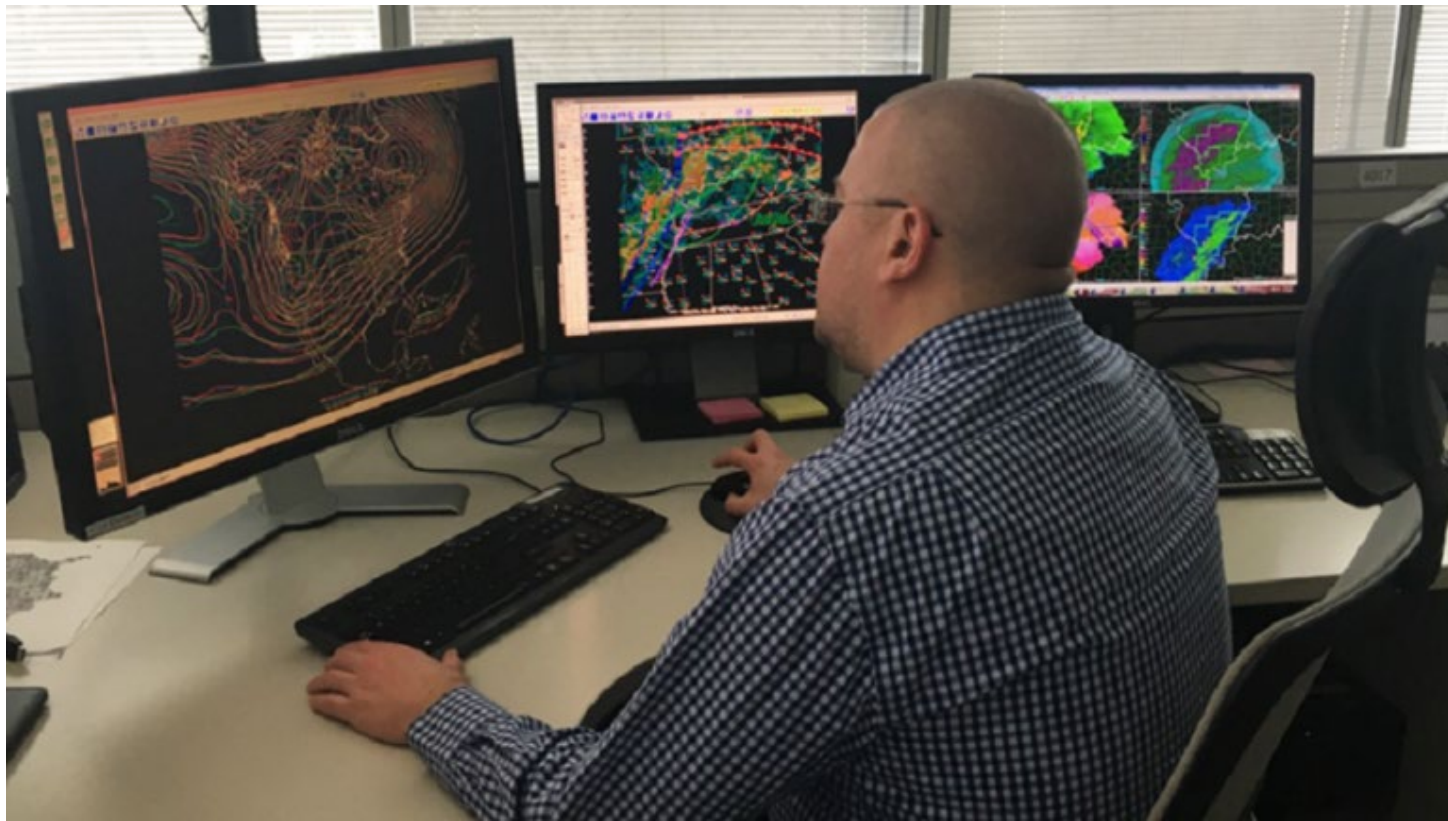

WINTER STORMS ARE UNPREDICTABLE & CAN BE DANGEROUS

We have technology and training, so how could there be any problems?

Even with these advancements, the weather is still in charge!

HOW COULD ONE OF MY EMPLOYEES GET STRANDED?

Stuck, no cell service, 14 inches of snow, windchill of -10, NOW WHAT?

Truck has serious incident or breakdown
No communication, no heat, what now?

Employee Health Concerns- could be a hidden disaster, and they're stranded!

Heart Attacks, Strokes, even Concussion from a slip and fall are real problems

Preparation is the key, Not just a Plan A,
but a Plan B that is ready to GO!

When modern communication fails, it will be time to go “Old School”!

With on-site cameras, you can add one more layer of employee security

Go Bag 2.0 with company logo and many of the must have items inside

Hydrate, Healthy Foods, Happy Employees

Give them fresh clothing in case they are going to be exposed to the elements

Prepare your vehicles for “Worst Case” scenarios! Not expensive, but effective

Encourage your people to stay healthy
and see a doctor regularly

The Buddy System may still be the best insurance policy you could have

RECAP- PUT THESE ON YOUR RADAR

- ▶ WORKING IN A REMOTE LOCATION
- ▶ COMMUNICATION ELEMENT FAILURES
- ▶ SERIOUS BREAKDOWNS OR FIRES
- ▶ EMPLOYEE MEDICAL ISSUES

HAVE A PLAN.....

B

YOU MAY NOT ALWAYS HAVE SOMEONE CLOSE BY TO HELP!
