

# SNOW SITE ENGINEERING PLANNING CHECKLIST – USING SITE MAPS/AERIAL VIEWS

## LOCATIONS TO IDENTIFY:

1. Property boundary lines
2. Emergency exits
3. Fire hydrants
4. Wheelchair access areas
5. Drains and manholes
6. Storm water management and retention ponds
7. Areas to store equipment and materials and where direct report employees park

## OPERATIONS LOGISTICS TO INCLUDE:

8. Cardinal directions – to identify what areas may drift and are in shade areas
9. Patterns for efficiently clearing snow and spreading salt
10. Areas to stack / store snow – where to create snow piles
11. Priority areas – what areas to address first priority, second, when storm ends
12. Square footage for production rates and salt usage calibration
